

Quick reference guide for the AS52X Service software

For Microsoft Windows 95/98™, NT™, 2000™, XP™

The complete **manual** and the **AS52X Service software installer** can be downloaded from the internet pages of the **Mixe Communication Solutions BV** or the **Friedrich KUHNT GmbH** at:

<http://www.mcs-nl.com/downloads.htm> or
<http://www.kuhnt.de/down/52xwin32.zip> (direct link)

The AS52X Service software is for all types of AS52X interfaces and runs under MICROSOFT Windows 95/98™, XP™ (WINDOWS NT™, 2000™) operating systems.
Extract the ZIP file into the [52xwin32] directory and start the setup with:

> setup.exe < (from C:\WINDOWS\TEMP\52xwin32 for example)

Please follow the instructions that are made in the installation routine.
The English manual files are:

52X_MAN_ENG.PDF and **52X_INFO_EN.pdf** (Acrobat Reader 4.0)

Before you begin:

Please assure you have all SIM card information and the set up data of the PABX S₀- bus.
Generally you need this information:

- PIN number of all SIM cards
- all prefix codes of your service provider
and of the SIM cards numbers
- physical type and set up of the S₀-busses
(point to point or point to multi point / EDSS 1 or QSIG etc.)
- if necessary the subscriber numbers of the S₀-buses

Useful hints:

It is possible to install a second (further) version of the AS52X Service software on one computer system if different directories are used. But we recommend you to uninstall former versions before an update is installed

On WINDOWS NT™, WINDOWS 2000™, XP™ operation systems you need to have "administrator" rights in some cases to install the software and to have access to the COM-ports of your computer.

Basically all software (firmware) releases of the AS52x interfaces are compatible with this Version 2.1 (build 1.58) of the AS52X Service program. That means this is a configuration tool for all former releases of firmware, too.
If you are not sure your AS52x interface has a 2.x, 3.x or 4.x firmware revision, upload the configuration data from your target system and check the release with the "show target parameter" function.

The revisions of the AS52X Service program should be REV 2.1 (build 1.58), click on the question mark for detailed information. The latest firmware revisions is REV 4.3. (REV 4.x and higher are with announcements in *Suomi* language instead of *German*) .

If you have any problems with the installation the software or when configuring your AS52X interface please sent an e-Mail for support to: support@mcs-nl.com or contact your distributors support.
